Honors Mission

The Susan and Stephen Weber Honors College creates and sustains a culture of excellence, an academic environment in which students experience a dynamic, interactive, and engaged education. One of the most important aspects of participating in the Weber Honors College is becoming part of the honors culture at SDSU and getting to know other diverse, curious, and motivated students who share a commitment to academic excellence.

The mission of the Weber Honors College is, however, about much more than aspiration and academic excellence. It also provides a unique community of place and purpose and a gathering space for students who share a commitment to achievement, to giving back to the communities in which they live and work, and to deep engagement.

The Weber Honors College fosters an intentional community of diverse engaged students; a unique atmosphere of creativity; interdisciplinary conversation; intellectualism; and collegiality.

Honors students enjoying the 1,593-foot summit of Cowles Mountain, the highest point in the city of San Diego.

The Honors Minor

The Honors Minor in Interdisciplinary Studies is a unique curriculum that Honors students take while they are at SDSU. The Honors Minor includes courses dedicated to interdisciplinary inquiry and provides an ideal avenue for students to become intellectually well-rounded. All Honors classes are interactive and discussion-based, and enrollment is capped at 20.

The Honors Minor in Interdisciplinary Studies consists of 15 total units. Three of these units count toward General Education requirements. The 15 units (five classes) are intended to be spread across the student’s time at SDSU. Depending on when they are admitted, students can complete the curriculum in two, three, or four years. Students typically enroll in at least one Honors class per academic year.
Examples of Honors classes include the following:

Art and Crime

Bootloose: Italian Migrations in Literature, Film, and Popular Culture

Hip Hop and Religion

Humanity’s Journey Towards Evil or Hope

Globalization: The Role of Technology and the Demand for Innovation

Natural Resources and Human Societies: Innovation, Constraints, and the Luck of Geography

The Innovation Economy: Creativity, Culture, and the Role of Global Communications

The Lived Experience of Immigrants and Refugees

School Violence, Rampage Shootings, and Criminal Minds

Sustainability and the Literature of Place

Sustainable Solutions

Vivace Club: Volunteerism in the Arts

Quality rather than quantity separates Honors courses from non-Honors classes. Honors classes do not offer merely more of the same material as their non-Honors counterparts; instead, they show greater breadth and integration. We encourage honors faculty to incorporate course enhancements that provide an enriched learning environment, such as field trips and service-learning projects within the community. Honors classes are made available to all Honors students regardless of major; therefore, they address topics of broad interest and do not have prerequisites.

Honors students often do better in their Honors courses than in their non-Honors courses, partly because of the quality of the instruction, partly because of the personalized mentoring students receive from professors, but mainly because of the power that comes from putting curious, engaged, and motivated students together.
The Weber Honors College provides students with numerous benefits for their participation. Through interdisciplinary classes taught by our best faculty, Honors students engage with challenging ideas, work side by side with professors, and apply their knowledge to real-world problems. The Weber Honors College represents a community of undergraduates who will become global citizens capable of the highest levels of critical thought, skilled in analysis and expression, and capable of negotiating difference. Weber College graduates have a strong foundation and commitment to being engaged, dynamic, citizens with the calling and responsibility to build a better, stronger society.

**Honors Residential College**

All freshmen Weber Honors College students are required to live on campus in the Honors Residential College during their first year at San Diego State University (SDSU). This policy was designed to ensure an exceptional undergraduate experience for Honors students at SDSU. Students living in the Honors Residential College will have the advantage of experiencing a small, intellectually and socially vibrant liberal arts environment, while enjoying access to all the resources of a large research university.

**Smaller Class Size**

The number of students who may enroll in an Honors course is limited to 20. Although the university average classroom enrollment is 42 students per class, that is not necessarily the case for General Education classes, many of which are held in large lecture halls seating 80 to 300 people.

**Study Abroad Support**

The Associate Director for International Engagement helps Honors students identify appropriate study abroad programs for their individual needs.

**Academic Advising Support**

The Weber Honors College Academic Adviser provides support and guidance to help Honors students reach their academic goals.

**Academic Engagement Support**

The Weber Honors College Associate Director helps Honors students identify and compete for nationally and internationally competitive scholarships, as well as research, leadership, service, and creative arts opportunities.

Honors student Nick Furey in Morocco as part of his study abroad experience.
The Honors Minor In Interdisciplinary Studies

The Weber Honors College cultivates local and global leaders through an interdisciplinary and integrated high-impact curriculum that develops bold and innovative thinking. The Honors curriculum encourages a high level of faculty-student interaction, meaningful exchange among motivated students, and integrative thinking across diverse disciplines. Students completing the Honors curriculum graduate with a major in their primary field of study and with the Honors Minor in Interdisciplinary Studies.

A Community

Students enrolled in the Weber Honors College participate in a number of social, cultural, academic, and community service activities organized by the Weber Honors College Student Society.

Study Abroad Opportunities

The Weber Honors College is founded on the belief that studying abroad is one of the most beneficial opportunities that undergraduates have at SDSU. Study abroad offers students opportunities to expand their knowledge of the world and to better understand both themselves and others. To meet the study abroad requirement, Honors students can choose from short-term study tours, summer-abroad programs, semester-long and year-long exchanges.

Research, Scholarship, and Creative Activity Opportunities

The Weber Honors College is committed to enhancing the intellectual climate and to developing a community of undergraduate scholars by promoting a variety of opportunities for student engagement in research, leadership, service, and performing arts. Through their participation in these opportunities and in the broader intellectual life of the university, Honors students lay the foundation for even greater academic achievement.

A Private Library Study Room

Honors students have exclusive access to the private Darlene Gould Davies Honors Study Room in the Love Library. The private room is a great place to study between classes, hold a group-project meeting, or spend quiet time doing research. Students do not have to compete for study space with thousands of other students as they do in public areas of the library.
The Weber Honors College is focused on high-impact learning or high-impact educational experiences. High-impact learning occurs when students are actively engaged in the educational process, when their learning goes beyond the classroom to be applied in their personal and work lives. In a high-impact learning experience, students actively pose and solve problems, work collaboratively in a community of peers, experience real-world applications of knowledge, and reflect on their learning. Students engaged in high-impact learning often see improvement in their grade point averages, gain their degrees more quickly, and are more engaged in their education.
**Live Your Dream**

The Weber Honors College Residence Hall provides a unique, supportive community where highly motivated students encourage each other to excel as they share experiences in and out of the classroom. Honors students from diverse backgrounds enjoy a rich array of academic, co-curricular, and experiential activities and an endless opportunity for interaction with other Honors students, faculty, and staff.

**Embrace Your Campus**

Mark your calendar! Honors students kick off the year by participating in Aztec Nights, a line-up of exciting on-campus, after-dark activities during the first weeks of each semester. In addition, there is the Aztec Recreation Center where you can participate in intramural sports, take group fitness classes, and go rock climbing. And, do not forget to enjoy the state-of-the-art Conrad Prebys Aztec Student Union and to be a part of The Show, the unique student section at SDSU athletic events.

**Explore Your World**

Weber Honors College students can live and learn all over the world through more than 350 study abroad programs in over 50 countries. Honors students have studied Art in the Context of Globalization and Social Change in Morocco, Popular Culture and Identity in China, and Conflict Resolution and Sustainable Peace in Costa Rica. Where in the world will you go?

**Make Your Mark**

The Weber Honors College offers support for students to participate in extraordinary opportunities. As a result of this support, Honors students from SDSU have attended graduate programs at Harvard and the Massachusetts Institute of Technology, served as interns in the White House, received Fulbright awards, and won prestigious national accolades such as the Udall Scholarship for their commitment to the environment.

**Contribute to Your Community**

The Weber Honors College community offers more than just an enhanced academic experience with top faculty. You can gain leadership experience within more than 300 student organizations, serve as an Executive Officer in the Weber Honors College Student Society, support SDSU as an Ambassador, and help coordinate educational, social, and service activities. Honors students sponsor and participate in events such as Aztecs Rock Hunger, The Color Run, Trivia Nights, and they volunteer at the International Rescue Committee.

Rendering of the new Weber Honors College Residence Hall, South Campus Plaza, scheduled to open Fall 2016.
Honors at San Diego State challenged me to interpret my identity through multiple lenses, including civic and corporate citizenship. Through my experiences, I developed a set of core values built on humility and social responsibility, and the ability to make a difference. I know my experiences in Honors were critical to my success getting a job in Mergers and Acquisitions Integration with eBay, Inc.

Gagandeep Singh  
2010 Honors Graduate  
Currently at eBay

Honors provided the space, knowledge, and support necessary to critically examine the world around me. The thought-provoking Honors courses, led by some of the most talented and respected professors at SDSU, in combination with the strong community that exists among Honors students and staff laid the foundation for me to engage in the social justice work I pursue today, working as the Legislative Director for Senator Mike Johnston.

Renee Payne  
2011 Honors Graduate  
Currently at Google

Since graduating from San Diego State, I have completed my Master’s degree in Industrial/Organizational Psychology and landed a job working in Human Resources at Google, where I am able to apply my skills and knowledge in the field of workplace behavior and organizational psychology. My experience with Honors, particularly studying abroad in Singapore, taking several small interdisciplinary seminars, and conducting research, prepared me very well for graduate school, which then helped me land a great job at an incredible company.

Levi Lentz  
2012 Honors Graduate  
Currently at MIT

Honors paralleled my engineering studies nicely by providing a human element often missing from the rigors of mathematical modeling. Overall, Honors is the main reason I enjoyed so much success at San Diego State by teaching me the necessity of working with people from all backgrounds. I was able to leverage my experiences in Honors and continue my studies in graduate school at MIT.

Eligibility Requirements

High School Applicants
High school seniors (incoming college freshmen) will be required to meet one of the following three eligibility criteria in order to apply:

- A grade point average of 3.70 or above, or
- A score of 1200 or above on the SAT (Math & Verbal), or
- A composite score of 28 or above on the ACT

Currently enrolled SDSU Applicants
Current SDSU students must have at least a 3.20 cumulative grade point average in order to apply.

Transfer Applicants
Students applying from a community college or another university must have at least a 3.20 cumulative grade point average in order to apply.

Apply online at sdsu.edu/honors

Given the competitive nature of the application process, we strongly urge all interested students to apply to the Weber Honors College by January 15. Applications submitted by January 15 ensure consideration for Weber Honors College scholarships.
The Susan and Stephen Weber Honors College is named in honor of Susan Weber and her husband, Dr. Stephen Weber, the seventh president of San Diego State University.

The Webers devoted their lives to the pursuit of knowledge and were passionate advocates for higher education. During Dr. Weber’s service as president (1996 to 2011), the university increased its academic standing and emerged as a leading public research university. As first lady, Susan Weber raised SDSU’s profile through her leadership of community organizations.

SDSU’s commitment to Honors was a special interest of the Webers. Dr. Weber directed funds toward an endowment that helped build the Honors College, and Susan Weber introduced honors students to San Diego community members.
