

The National Defense Science and Engineering Graduate Fellowship

The Department of Defense (DoD) is committed to increasing the number and quality of our nation's scientists and engineers. Toward that end, the DoD annually supports approximately 8,000 graduate students in fields important to national defense needs. The DoD offers fellowships to individuals who have demonstrated ability and special aptitude for advanced training in science and engineering, including (but not limited to) aeronautical and astronautical engineering, biosciences, chemistry, civil engineering, computer science, geosciences, mathematics, mechanical engineering, oceanography, and physics. Applicants must be a US citizen or national, be pursuing a doctoral degree, and may be a senior, first year graduate student, or one who already received their bachelor's degree but has not started graduate school. Fellowship award consists of full tuition and required fees, and a stipend of \$30,500 the first year, \$31,000 the second year, and \$31,500 the third year.

Foundation Deadline: 1:00 p.m. (EST) January 7, 2008
